Team up with fellow campers to solve the "Great Cookie Caper" crime. Arrive to find a real crime scene surrounded by crime scene tape. You will develop skills that will be needed as you use new devices to collect & record your evidence and solve the crime. In the Mad Science Lab you will experiment with electrochemical reactions, create chemical compounds and make your own "brain goo"! Along the way to becoming a crime scene expert you will also work with chemical bonds, discover conductivity, and make your own invisible ink to take home.
